Requirements Traceability Matrix — Leish! Aesthetic Marketplace

Version: 1.0 · **Date:** 2026-10-12

Goal / outcome	Product requirements	SRS / technical controls	Use case
Fast trustworthy discovery	FR-1.1…FR-1.7, FR-2.1…FR-2.6	SRS-F-001/002, SRS-Q-003/004	UC-01
Convert browsing to bookings	FR-3.1…FR-3.5	SRS-F-003, SRS-Q-002/006	UC-02
Useful AI differentiation	FR-4.x, FR-5.x, FR-10.x	SRS-F-007, AI API envelope	UC-07/08
Provider weekly utility	FR-6.x, FR-7.x	SRS-F-005/006, ownership rules	UC-04/05
Workspace capability	FR-8.x	SRS-F-008, OAuth scope controls	UC-09
Safe account handling	FR-9.x, NFR-1…NFR-3	JWT, bcrypt, authz matrix	UC-03
Durable production data	NFR-7, TR-2	DataStore interface and migration	UC-10
Launch readiness	PRD release criteria	CI, runbook, rollback	UC-10

Traceability rules

Every new product requirement must receive an ID, an SRS reference, an implementation owner, and at least one executable or manual test. A requirement marked complete without evidence is considered unverified. When behavior changes, update PRD, SRS, API/data docs and tests together.

Current unverified items

Production Firestore durability, real distance calculation, Workspace write flows, consent-backed analytics, payments, real availability and full visual/accessibility audit remain intentionally open and must not be reported as complete.
